CHARTERS.

40th GEORGE III.

22nd March, 1800.

GEORGE THE THIRD, by the Grace of God, of Great Britain, France, and Ireland, King, Defender of the Faith, &c. To all to whom these Presents shall come, Whereas our Royal Predecessor, King Edward IV., by certain Letters Patent, under the Great Seal of England, bearing date the 24th Day of February, in the first Year of his Reign, did at the Supplication of the Freemen of the Mystery of Barbers of the City of London, using the Mystery or Faculty of Surgery, grant to them, among other Things, that the said Mystery, and all the Men of the same Mystery of the said City, should be one Body and Perpetual Community, and that two Principals of the same Commonalty, of the most expert Men in the Mystery of Surgery, might, with the assent of twelve or eight Persons at the least, of the same Community, every Year elect and make out of the Community, two Masters, or Governors, being the most expert in the Mystery of Surgery, to oversee, rule, and govern, the Mystery and Commonalty aforesaid.

Recital of the Letters Patent of 1st Edward 4th;

incorporating the Freemen of the Mystery of Barbers of the City of London.

And whereas by an Act of Parliament, made and passed in the 32d Year of the late King Henry VIII. intitled for Barbers and Surgeons, after reciting, that, within the City of London, there were then two several and distinct Companies of Surgeons, occupying and exercising the Faculty of Surgery, one Company called the Barbers of London, and the other Company called the Surgeons of London. It was thereby enacted, That the said two several and distinct Companies of Surgeons should from thenceforth be united, and made one intire and whole Body Corporate, and one Commonalty Perpetual, which at all times thereafter should be called by the Name of the Masters or Governors of the Mystery and Commonalty of the Barbers and Surgeons of London; and by the same Name to implead and be impleaded before all manner of Justices, in all Courts, and in all manner of Suits.

Of the Act 32d Henry 8th.

By which the two Companies of Barbers of London, and Surgeons of London were united.

Of the Letters Patent of 5th Charles 1st.

And whereas, in and by certain Letters Patent, under the Great Seal of England, bearing Date the 15th Day of August, in the 5th Year of the Reign of His late Majesty, King Charles I., reciting that the Men of the same Companies enjoyed divers Liberties and Franchises within the City of London, the Suburbs and Liberties thereof, by virtue of divers Acts of Parliament, and divers Charters, and Letters Patent, His said Majesty did grant and confirm unto the said Masters and Governors of the Mystery and Commonalty aforesaid, and their Successors, all and singular the Manors, Messuages, Lands, Tenements, Customs, Liberties, Franchises, Immunities, Jurisdictions, and Hereditaments, whatsoever, which the Men of the said Companies then held, used, and enjoyed, by any lawful Means or Title whatsoever: And his said late Majesty did thereby give power to the said Corporation, to make annual Elections of Masters or Governors of the said Commonalty, whereof two to be Professors in the Art and Science of Surgery; and also to elect and constitute ten of the Freemen of the said Society to be Examiners of Surgeons in London.

Which confirmed to such united Company all the possessions, franchises and liberties which the said Company then held and enjoyed,

with power to make annual Elections of Masters or Governors whereof two to be Professors in Surgery; and to elect ten Freemen to be Examiners.

Recital of the Act of 18th of George 2d.

And whereas, by an Act of Parliament, made and passed in the 18th Year of the Reign of our late Royal Grandfather, King George II., intitled "An Act for making the Surgeons of London, and the Barbers of London, two separate and distinct Corporations," It was enacted, that the said Union and Incorporation of the Barbers and Surgeons of London, made and effected by the aforesaid Act of the 32d Year of King Henry VIII. should, from and after the 24th Day of June, 1745, be dissolved and declared void and of no effect; and that such of the Members of the said united Company who were Freemen of the said Company, and admitted and approved Surgeons, within the Rules of the said Company, and their Successors, should from thenceforth be made, and they were thereby made and constituted, a separate and distinct Body Corporate and Commonalty Perpetual, which at all times thereafter were to be called by the Name of Master, Governors and Commonalty of the Art and Science of Surgeons of London, and by the same Name might implead and be impleaded before all manner of Justices, in all Courts, and in all manner of Actions and Suits, and take to them and their Successors, Lands, Tenements, Rents, or Hereditaments, not exceeding the yearly Value of £200 in the whole.

by which the Union of the two Companies was dissolved;

and which constituted a distinct Company of Surgeons, by the Name of "The Master, Governors, and Commonalty of the Art and Science of Surgeons of London."

Recital that such Corporation was dissolved.

And whereas, we are informed that the said Corporation of Master, Governors, and Commonalty of the Art and Science of Surgeons of Lon-

don, hath become and now is dissolved: And whereas, it is of great consequence to the Commonweal of this Kingdom, that the Art and Science of Surgery should be duly promoted: And whereas, it appears to us, that the Establishment of a College of Surgeons will be expedient for the due promotion and encouragement of the Study and Practice of the said Art and Science, Now We, of our special Grace and mere Motion, and at the humble Petition of James Earle, Esquire, the late Master, and divers other Members of the aforesaid late Corporation of Surgeons; have willed, ordained, constituted, declared, given and granted, and by these Presents, for Us, Our Heirs, and Successors, do will, ordain, constitute, and declare, give and grant; unto the aforesaid James Earle, and unto all the Members of the said late Company or Corporation of Master, Governors, and Commonalty of the Art and Science of Surgeons of London; having been admitted and approved Surgeons, within the Rules of the said Company; and also unto all such Persons, who upon, or since, the dissolution of the said Corporation, shall have obtained Letters Testimonial, under a Seal purporting to be the Seal of the said late dissolved Corporation, authorizing them to practise the Art and Science of Surgery; and they, from henceforth for ever hereafter, shall be and remain by virtue of these Presents, one Body Corporate and Politic; by the Name of The Royal College of Surgeons in London, and by the same Name shall and may have perpetual Succession, and a Common Seal; with power to break, alter, and make anew the said Seal, from time to time at their will and pleasure; and by the same Name shall and may implead, and be impleaded, before all manner of Justices, in all Courts, and in all manner of Actions and Suits; and shall be at all times for ever hereafter persons able and capable in Law to take, purchase, possess, hold, and enjoy, and shall and may take, purchase, possess, hold and enjoy, a Hall or Council-house, with its Appurtenances, situate within the Cities of London or Westminster, or within one Mile of either of them, for the use and purposes of the said College; and also any other Lands, Tenements, Rents, or Hereditaments, wheresoever situate, lying and being; not exceeding, together with the aforesaid Hall or Council-house, and its appurtenances, the yearly value of one thousand Pounds in the whole; without incurring any of the Penalties in any Statute of Mortmain, or any Thing, in any Statute of Mortmain, to the contrary notwithstanding.

That it is of great consequence that the Science of Surgery should be duly promoted,

and that a College will be expedient for the due encouragement thereof.

Therefore His Majesty was pleased to incorporate the Members of the late Company, and all such Persons who since the Dissolution thereof have obtained Letters Testimonial &c.

By the name of "The Royal College of Surgeons in London."

With perpetual succession and a common seal;

and power to hold and enjoy a Council-house within London or Westminster or one mile of either of them; and to possess lands and tenements, including such Council-House of the yearly value of £1000 in mortmain.

And it is Our further Will and Pleasure, that nothing in these Presents

Proviso,—That the City of Lon-

don shall not have any jurisdiction over the College.

shall be construed to give the Corporation of the City of London any Power or Jurisdiction over the said College hereby established and incorporated;

Nor the Members of the College enjoy any franchise belonging to the Freemen of the City of London.

and that no Person, by virtue of these our Letters Patent, constituted or ordained, or hereafter to be admitted a Member of the said College, shall be thereby entitled to any Franchise belonging to the Freemen of the City of London.

The College to enjoy all other privileges and possessions by any former Acts or Letters Patent, given to, or otherwise acquired by, the late Company, not hereby altered, &c.

And it is Our further Will and Pleasure, and we do hereby, so far as We lawfully can or may, grant and ordain, that the said Royal College of Surgeons hereby incorporated, shall and may exercise and enjoy all and singular other the Gifts, Grants, Liberties, Privileges and Immunities, Possessions, real and personal, whatsoever and wheresoever, hereinbefore mentioned, or by any Act or Acts of Parliament, or by any Letters Patent, of Our Royal Predecessors, Kings and Queens of England given, granted, and confirmed unto, or otherwise lawfully acquired by, and belonging to the said late Master, Governors, and Commonalty of the Art and Science of Surgeons; or any of them, and not hereby altered, taken away, changed, or abridged, made void, or annulled.

THE COUNCIL.

The Council, the governing body of the College, consists of twenty-four Members, three* of whom, when no vacancy, either by resignation or death, has occurred during the year, go out in rotation annually in July, but are eligible for re-election by the Fellows of the College. All proceedings of the Court of Examiners, the Midwifery and Dental Boards, and the several Committees are reported to the Council for approval and confirmation. The Meetings of the Council are generally held in each month of the year, except in the month of September, and at such other times as the business of the College may require. During the past Collegiate Year there have been fourteen Meetings.

* If in any year one of the three retiring Members be President of the College, he does not go out of office until the succeeding year.

THE COURT OF EXAMINERS.

The Court of Examiners consists of ten Members elected by the Council from the Fellows of the College. The Court superintends the carrying out generally the regulations of the Council relating to the preliminary and professional education of Students, and conducts the professional examinations of Candidates for the Diplomas of Fellow and Member of the College. During the past Collegiate year the Court has held six Meetings for the Examinations for the Fellowship, and fifty-two Meetings for the Primary and Pass Examinations for the Membership. The following is a statement of the number of Candidates who presented themselves for the Fellowship and Membership respectively, with the results of the several Examinations, viz. :—

The Board consists of six Members elected by the Council for five years, viz. :—three Members of the Court of Examiners of the College, and three other persons skilled in Dental Surgery. The Board conducts the Examination of Candidates for the Diploma in Dental Surgery of the College. During the year sixteen Candidates have been examined, all of whom passed to the satisfaction of the Board.

THE MUSEUM.

The Hunterian Collection, which forms the basis, and still a large proportion, of the contents of the present Museum of the Royal College of Surgeons of England, was originally arranged in a building which its Founder, John Hunter, erected for it in 1784, behind his house in Leicester Square.

John Hunter died October 16th, 1793, aged 65. By his will he directed the Museum to be offered in the first instance to the British Government, on such terms as might be considered reasonable, and in case of refusal, to be sold in one lot, either to some foreign state, or as his executors might think proper.

In the year 1799 Parliament voted the sum of £15,000 for the Museum, and an offer of it being made to the Corporation of Surgeons, it was accepted on the terms proposed by Government*.

In 1806 the sum of £15,000 was voted by Parliament in aid of the erection of an edifice for the display and arrangement of the Hunterian Collection; a second grant of £12,500 was subsequently voted, and upwards of £21,000 having been supplied from the funds of the College, the building was completed in Lincoln's-Inn-Fields, in which the Museum was opened for the inspection of visitors in the year 1813.

* The following are the Terms and Conditions on which the Hunterian Collection, purchased by Parliament, was delivered to the late Corporation of Surgeons; which Corporation having become dissolved, the Members thereof were re-incorporated by Charter, dated the 22nd day of March, 1800, under the Title of The Royal College of Surgeons in London:—

1st. The Collection shall be open Four Hours in the Forenoon of two days every week for Inspection and Consultation of the Fellows of the College of Physicians, the Members of the Company of Surgeons and Persons properly introduced by them; a Catalogue of the Preparations, and a proper Person to explain it, being at those times always in the Room.

2nd. That one Course of Lectures, not less than twenty-four in number, on Comparative Anatomy and other subjects, illustrated by the Preparations, shall be given every year by some Member of the Company.

3rd. That the Preparations shall be kept in a state of Preservation, and the Collection in as perfect a state as possible, at the Expense of the Corporation of Surgeons, subject to the annual Inspection and Superintendence of the Trustees.

4th. That there shall be a Board of Trustees, to consist of sixteen (increased to seventeen by the Lords of the Treasury in 1856) Members, by virtue of their Public Offices, and of four others, to be appointed, in the first instance, by the Lords of the Treasury, and afterwards elected, as Vacancies may happen, by a Majority of the remaining Trustees.

5th. That the Museum shall always be open for the Inspection of all or any of the said Trustees, who are to take care that the Corporation of Surgeons perform their Engagements respecting the said Collection. That a day be appointed for the annual Inspection of the Museum, by the Trustees acting collectively as a Board; and that they are also to have quarterly Meetings, for the transacting of any Business relative to the Museum, and for the filling up of such Vacancies as may happen in the number of the Trustees; and that the Corporation of Surgeons shall engage some Person to officiate as Secretary to the Board upon such occasions, and to issue previous Notice to the Members, in which he is to state particularly whether any Vacancies are to be filled up by new Elections.

In consequence of the large number of additions, this building became too small for the adequate display and arrangement of its contents; and more space being at the same time required for the rapidly increasing Library, the greater portion of the present building was erected, wholly at the expense of the College, in 1835, at a cost of about £40,000, and the Hunterian and Collegiate Collections were re-arranged in what are now termed the Western and Middle Museums, which were opened for the inspection of visitors in 1836.

Further enlargement of the building having become necessary by the continued increase of the Collection, the College, in 1847, purchased the extensive premises of Mr. Alderman Copeland, in Portugal Street, for the sum of £16,000, and in 1852 proceeded to the erection of the Eastern Museum, at the expense of £25,000, Parliament granting £15,000 in aid thereof. The re-arrangement of the specimens was completed, and the additional portion of the building opened to visitors in 1855.

The Hunterian Collection was estimated to consist of 13,682 specimens distributed under the following heads:—

Physiological Department, or Normal Structures.

Physiological preparations in spirit	3745
Osteological preparations	965
Dry do.	617
Zoological do.	1968
Fossils:—	
Vertebrate	1215
Invertebrate	2202
Plants	292

Pathological Department, or Abnormal Structures.

Preparations in spirit	1084
Dry preparations (including bones)	625
Calculi and concretions	536
Monsters and Malformations	218
Microscopic preparations	215

Of the additions by which the size and value of the Collection have been so materially increased since it came into the possession of the College, very many have been presented by Fellows and Members of the College, and other persons interested in scientific pursuits. Among the largest contributions from this source have been the Collection, consisting of 847 specimens, presented in 1811 by Sir William Blizard, and a valuable series of Pathological specimens presented in 1851 by Sir Stephen L. Hammick. At the same time the Council of the College have availed themselves of various opportunities as they have occurred to purchase specimens of interest, especially at the dispersion of private anatomical and pathological museums, as that of Sir A. Lever in 1806, of Mr. Joshua Brookes in 1828, of Mr. Heaviside, in 1829, Mr. Langstaff in 1835, Mr. South in the same year, Mr. Howship and Mr. Taunton in 1841, Mr. Liston in 1842, Mr. Walker in 1843, and deserving of especial mention on account of the great number and value of the specimens acquired, that of Sir Astley Cooper in 1843.

The Histological Collection, of which the 215 Hunterian specimens (prepared by Hewson) constitute the nucleus, was chiefly formed by the late Professor Quekett with considerable additions by purchase from Dr. Tweedy J. Todd, Mr. Nasmyth

and Professor Lenhossek. It now contains upwards of 12,000 specimens, all arranged and catalogued so as to be readily available for reference.

The superintendence of the Museum is confided by the Council of the College to a Committee of its Members, which Committee has held four meetings during the past year.

A summary of the progress made in the preservation, arrangement, and augmentation of the Collection will be found in the following Report:—

ANNUAL REPORT OF THE CONSERVATOR TO THE MUSEUM COMMITTEE.

(Presented June 30th, 1873.)

I. Pathological Collection.

The additions to this series, made during the past twelve months, are 100 in number, as compared with 88 in the previous year, and 62 in the year before. They have all been catalogued and mounted by Dr. Goodhart, Pathological Assistant to the Museum. Among them is a very remarkable complete human skeleton, showing the effects of extreme lateral curvature of the spine, associated with rickets. This skeleton has been prepared by Mr. James Flower, the College Articulator, great care having been taken, by means of plaster casts, to preserve the exact relative position which the bones occupied during life.

105 pathological specimens have been remounted during the past year.

II. Osteological Collection.

The articulated skeletons exhibited to the Committee to-day show still further improvements in the method of mounting, especially in the vertebral column, the examination of the separate bones of which had hitherto presented some difficulties. These are now completely surmounted by a method devised by the Articulator, at once simple and efficient, which must, however, be seen to be properly understood.

The series of human osteology has received a very important accession in one hundred crania from ancient Peruvian burial-grounds, presented by the Anthropological Institute of Great Britain and Ireland. They form part of a large collection forwarded to the Institute by T. J. Hutchinson,

Esq., H.B.M. Consul at Callao; and all have the localities from which they were obtained carefully registered.

Such a considerable series of skulls of one race is of great interest, as it proves the constancy of the characteristic type; for they are, with scarcely an exception, extremely brachycephalic, with flat retreating foreheads, a character in many cases evidently exaggerated by artificial pressure in infancy. An account of this collection has been read at the Anthropological Institute, by the President, Mr. Busk, and will shortly be published.

III. Physiological Collection.

As the time of Mr. Lidderdale, Anatomical Assistant in the Museum, has been chiefly occupied by the Court of Examiners in preparing new specimens and remounting and replacing the old ones, the additions to this series have not been quite so numerous as last year.

Human anatomy is well represented by a set of preparations showing the distribution of the arteries of the head and neck, and of the lower extremity, made by Mr. W. Pearson. The muscular series commenced by Dr. Pettigrew having been nearly completed, the vascular system will now be worked out as opportunities permit, the present being the first instalment of preparations. They will take the place of the old dried vascular preparations, most of which have perished from the effects of time and attacks of insects, and which are altogether inferior in beauty and durability to the preparations preserved in spirit, such as those now exhibited.

175 preparations belonging to this series have been remounted during the year.

IV. Teratological Collection.

In the last Report it was mentioned that Mr. Lowne had completed the revision of this collection, and that the Catalogue was in the printer's hands. This was published towards the close of last year in the form of an 8vo volume of 110 pages, entitled "Descriptive Catalogue of the Teratological Series in the Museum of the Royal College of Surgeons of England." It contains an introductory chapter explanatory of the principles adopted in the classification of the specimens, followed by descriptions of the 479 specimens in the Collection. The classification of these objects has always been a subject of great difficulty, owing to our imperfect knowledge of the causes and modes of their occurrence. The present one of course can still only be looked upon as tentative; I trust, however, that it will prove an improvement upon its predecessors; at all events it has great conveniences in facilitating the arrangement of the specimens in the Museum. It may also be hoped that the publication of Mr. Lowne's Catalogue will lend some stimulus to the study of this obscure and much-neglected subject.

V. Collection of Surgical Instruments and Appliances.

The complete arrangement of this Collection was noticed in the last Report. Several additions have been since made, though perhaps not in such numbers as might have been anticipated. At the request of Her Majesty's Commissioners for the Exhibition of 1851, a selection of the more ancient and curious instruments in the Collection has been lent, with the sanction of the Council, for the purpose of forming part of the series of Surgical Instruments at present exhibited in the International Exhibition at South Kensington.

VI. Palæontological Collection.

The collection of fossil remains to which Hunter devoted considerable attention in the latter part of his life, has received large and valuable accessions since his Museum came under the care of the College; but, like most other departments of the Collection, it has long needed a thorough examination and revision. The valuable and elaborate descriptive catalogue of Fossil Remains of Mammalia and Aves was published in 1845; but little care seems to have been exercised in seeing that the numbers painted upon the specimens corresponded with those of the Catalogue; many specimens described were not to be found; and of the numerous additions subsequently made, very few were properly registered or labelled; so that the store-room and drawers had become filled with fossils without history, name of donor, or other means of identification. Owing to the pressure of more important work (as the revision of the Pathological, Histological, Osteological, Teratological, Physiological, and other series, the contents of which were of a more perishable nature), this condition of things has been allowed to remain up to the end of last year, when, having completed the revision and catalogue of the Physiological Series, I was able to commence that of the Palæontological Collection.

Without any view to increasing this department, which in an Anatomical Museum must be limited to the function of illustrating striking modifications of animal structure, especially such as cannot be shown in the recent series (with which it ought ultimately to be incorporated), it was quite necessary that the collection already within the walls of the building should be brought into a condition available for study, and that we should at all events have some ready means of knowing of what materials it consists. On this examination I am at present engaged; and to concentrate attention upon the subject, the Hunterian Lectures on Comparative Anatomy of the present year have been specially devoted to the illustration of this portion of the collection. Considerable progress has already been made in rearranging the specimens. The large skeletons of the Megatherium, Mylodon, and Glyptodon, which form such conspicuous objects of interest in the Middle Museum, have been thoroughly cleaned and repaired, and the stands on which they are placed painted to correspond with those

of the Eastern Museum. Nearly all the specimens in the wall-cases have also been cleaned and examined, compared with the Catalogue, and their numbers rectified when necessary; and a considerable number of the hitherto uncatalogued specimens have been identified, numbered, and registered. Much, however, still remains to be done before the department is in completely satisfactory order.

I conclude the Report, as usual, with a list of specimens added to the Museum since the last Annual Report, and which are now submitted to the inspection of the Committee.

THE LIBRARY.

The formation of a regular Library may be said to have commenced in the year 1801, at which time and in succeeding years presentations and bequests of books, often in considerable numbers, were made to the College; the principal donors being Dr. Baillie, Sir Everard Home, Sir Charles Blicke, the widow of Mr. Sharp, Sir Ludford Harvey, Dr. Fleming, Mr. Cotton, and Mr. Long. The Court of Assistants also directed from time to time the expenditure of small sums of money for the purchase of books, and eventually voted a sum of £100 per annum for this purpose. Sir Charles Blicke, in the year 1816, invested the sum of £300, the proceeds of which sum were to be devoted to the same object. Some of the purchases thus made were considerable, as in the cases of the Libraries of Mr. Pitt, Mr. St. Andre, and Sir Anthony Carlisle, and books of importance were added at the recommendation of the Conservator of the Museum and others. In this way a Library of considerable value was gradually accumulated, but it was only accessible to a limited number of persons. In 1827 active steps were taken to render it more generally useful, and with this object catalogues and extensive lists of desirable acquisitions were ordered to be prepared. Large sums of money were also expended during this and the ensuing two years, amounting in the aggregate to nearly £6000. A Librarian was appointed, and in 1828 the Library, then containing 10,500 volumes, was thrown open to members of the College, and all other persons engaged in the pursuit of natural science were freely admitted. This large collection, thus opened, offered great facilities to the studious. By means of extensive additions, the collection was well nigh complete in works on Medicine and Surgery, both domestic and foreign, whilst it was also very rich in publications relating to the accessory sciences. The transactions of Academies and Societies, and the collection of periodical publications in general, owing to their completeness, and the difficulty with which access can be obtained to this class of literature elsewhere than in large libraries, formed a valuable feature. The maintenance of the Library from that time to the present has involved a very considerable expenditure of the funds of the College. It has been the object of those to whose care it has been confided to ensure the completeness and excellence of the collection, and great facilities of reference have been provided by the preparation of additional catalogues and indexes of subjects. During the last year there have been added to the Library 448 volumes, comprising 121 new works and 676 tracts, pamphlets, essays, reports, and theses. The entire collection now contains 34,331 volumes, 13,939 works, and 37,245 tracts, pamphlets, essays, reports, and theses.

The following is a list of the donations that have been presented to the Library during the year 1872–73, viz. —
